

Neolith does not belong to what is traditionally known as “ceramic” or “porcelain”; it is rather an extreme evolution of these - to the extent of creating a new kind of surface previously inexistent. Neolith is the pioneer and continuous innovator of what is known as SINTERED STONE.

## What is a Sintered Stone?

It is a 100% natural material based on 3 groups of natural elements:

1. Granite Minerals: Quartz and Feldspar which grant hardness and strength to the product.
2. Glass Minerals and Silica which grant chemical stability.
3. Natural oxides which grant chromatic properties.

Sintering process is copying how stone is made in nature, only cutting this down from hundreds of millions of years to just eight hours.

### FORMAT

- 3 mm - 1/8"
- 6 mm - 1/4"
- 3+ mm - 1/8"
- 6+ mm - 1/4"
- 12 mm - 1/2"
- 20 mm - 3/4"

### FINISHES

SATIN

SILK

RIVERWASHED

NATURAL HONED

DÉCOR POLISHED

NANOTECH  
POLISHED
